OASIS D1

Including Regulatory and Guidance Update

This is a comprehensive 2-day training covering OASIS-D1. While the OASIS Guidance manual has not been revised, there are new Q&As, COVID-19 waivers and the CARES Act that update guidance on many items. We will concentrate on the payment items for PDGM and the OASIS items used for quality measurement, along with:

- Uses of OASIS data: payment, quality measurement, risk adjustment and more
- Items used for the functional score in PDGM
- Comparison of the M1800s ADL/IADL items and the corresponding GG items
- Latest guidance on wound items, including pressure ulcers and surgical wounds
- Items used to calculate Quality of Care Star rating and IMPACT Act quality measures
- OASIS time points required by PDGM, including correct use of the ROC and Other Follow-Up
- Impact of COVID-19 on OASIS guidance—What's staying and what's temporary.
- Lots of examples and practice scenarios to test your knowledge and understanding

OASIS-D1 was implemented January 1, so changes will be covered in detail, but this is a FULL OASIS class. Whether you are new to OASIS, or just need an overview of changes and a refresher of the key items, this class is for you!
