Webinar Overview:

Documentation scrutiny by payers and surveyors hits a nerve with many home health providers, who literally bank on keeping documentation compliant within changing requirements, all while keeping clinicians and office staff prepared and engaged. Telling the story of the patient in the chart while demonstrating skilled, reasonable, and necessary care delivery requires clear guidance and a consistent process to build and maintain a foundation of competence.

Join us as we discuss the overall outlook of review activity and provide foundational training and key stakeholder tips on defensible documentation practice in home health.

Objectives:

At the completion of this session, participants will be able to:

- Discuss the current landscape of payer review and audit activity in home health
- Relay best practices in support of compliant documentation within current home health regulatory requirements
- Engage clinicians, learning to leverage the use of their software platform in service of timely, quality documentation.

Presenter:
